

COMBATISOL

TRAVELLER

SPRAY COATING WITH ANTI-MICROBIAL TECHNICAL DATA SHEET

COMBATISOL - TRAVELLER is a long-lasting proprietary anti-microbial coating that can last for several hours with one simple application. In many cases, our in-house testing resulted in efficacy lasting many days. Easy spray application. This coating has been engineered to be protected with the world's leading anti-microbial.

APPLICATIONS:

- PUBLIC TRANSPORTATION. Seats, tray backs, arm rests in aircraft, subways, trains, buses.
- AUTOMOTIVE. Seats, handles, steering wheels.
- ELECTRONICS. Keyboards, cell phones, microphones.
- RESTAURANTS. Tables, chairs, dinner ware, table cloths, cloth napkins.
- CAFE & BARS. Countertops, billiard sticks, darts.
- Anywhere and everywhere.

BENEFITS:

- Non-toxic and no VOC.
- Keeps the treated surface coating free of pathogens for long periods.
- One application can last for hours. Surfaces with minimal abrasion can last for days or months.
- Application will be tackfree in as little as 3 minutes and fully cured in 5 minutes.
- Proprietary coating contains anti-microbials that continue to kill pathogens while the coating remains on the surface.
- Our anti-microbial does not give rise to resistant strains of pathogens such as MRSA.

PROPRIETARY COATING:

- Our proprietary coating is a micro coating that can be applied to many surfaces including metals, plastics, ceramics and even fabrics.
- Non-toxic and no VOC.
- Dries in 5 minutes in optimal conditions.
- Waterbased, non-flammable.
- One simple coating can last for hours.

ANTI-MICROBIAL:

- Non-toxic and no VOC.
- Does not give rise to resistant strains of pathogens such as MRSA.

HOW TO APPLY:

- Do not apply a thick coat. A thick coat is not necessary for efficacy.
- Hold at a distance of 10 to 12 inches.
- Spray a fine mist.
